ABOUT OUR COMPANY

We are a women-owned small business that specializes in delivering tailored solutions that meet the unique needs of our clients. We approach each client as unique. While we apply Agile principles and practices, we acknowledge that each environment presents opportunities for adapting.

At 4G Technology Solutions Inc., we inspire businesses and individuals to thrive through hands-on, innovative Agile solutions rooted in integrity and real-world insight. We partner with our customers to deliver transformation that feels achievable and endures — powered by collaboration, proven practices, and practical tools.

DIFFERENTIATORS

- We leverage real-world knowledge and expertise, operating based on experiences and successful outcomes rather than theory.
- We are skilled in adapting frameworks and tools to meet the needs of the organization.
- Typically, one group handles tool development while another focuses on process building. We combine these two aspects into one cohesive unit.
- All team members hold current certifications in various methodologies and tools, guaranteeing optimal results every time.

KEY CLIENTS

- Internal Revenue Service
- NASA Headquarters
- Office of the Comptroller of the Currency
- US Courts
- Department of Education
- Securitas Electronic Security

CORE COMPETENCIES

- Lead, mentor, and provide support to all Agile Framework Transformations
- Set up and configuration of SDLC tools to support methodology in use
- Provide skilled, knowledgeable and experienced Change & Configuration Management
- Data Migration from legacy to modern tool sets
- COTS implementation and configuration

PAST PERFORMANCE

- IRS - Enterprise Case Management
  Our team was at the forefront of this initiative working with our client to enable the tooling, practices, and processes needed to rapidly move legacy applications into an integrated COTS solution.
- Comptroller of the Currency
  We collaborated with the organization to standardize tools and Agile practices for development and various levels of testing. We maintained all tools and performed detailed customizations.

CERTIFICATIONS
